

COMMUNITY OF THE FUTURE

EMPATHY- TAKING ACTION

DESIGN MAP

Empathy

Students will explore the perspectives and needs of all citizens in their community and how they will influence the construction of their models.

What if everyone took action ?

WHO LIVES IN OUR COMMUNITY?

WHAT GOES ON IN OUR COMMUNITY?

WHAT DO WE LOVE ?

**HOW TO
DECOMPOSE
YOUR
COMMUNITY
PROFILE,
FIND 6
CHALLENGES
FROM YOUR
COMMUNITY.**

Why do they exist ?

For example- There is a strange smell in the air.
We have a paper pulp manufacture right in town .
This creates paper for people to use, creates jobs
and creates pollution.

There a lot of cars downtown.
We do not have public transit, nor pedestrians
walking paths.
A lot of people drive from out of town to get to work.

WHAT IS EMPATHY ?

Look at the following day to day actions.

What needs are being met?

How can we continue or improve the
way we meet them by taking into
consideration climate action?

LABOS

WHAT CAN YOU DO ?

I commit to

Share your personal commitment
on the pledge sheet.

Post those in the class.

That pledge then becomes a design
iteration in your class project.

**Why does it seem
harder for some people
to take action for
climate change?**

EXIT SLIP

What goes on in your
community that could be
perceived differently if
you only looked at it with
a climate action
perspective?
