

Attaching b.Board to Chassis

- 1** Identify the 4 holes in the b.Board to fix the b.Board to chassis

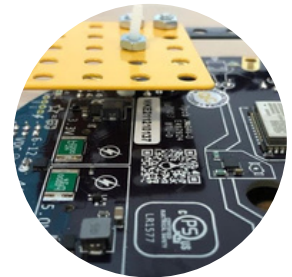

- 2** Use the plastic screws available to avoid short circuiting your b.Board

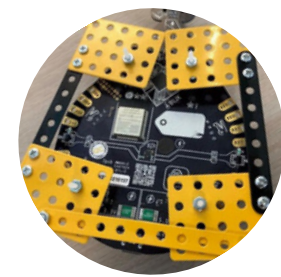

- 3** Add plastic spacers to separate the b.Board and the chassis

- 4** Use a washer and a nut to fix the chassis to the b.Board

- 5** Repeat the procedure with each of the 4 holes

Note: Your rover chassis can be any shape, just make sure there is space between b.Board and chassis to avoid any short-circuiting.
